

EEMITS SWITCHES PARK ASPIRE ACADEMY FROM LICENCE-FREE TO LICENCED RADIOS WITH NEW HYTERA BP515 SOLUTION

Park Aspire were in the market for two-way radios but had been looking at purchasing licence-free models. After a discussion with Eemits, we recommended a licenced radio solution that was budget-friendly and overcame coverage issues.

THE CHALLENGE

Park Aspire Academy is based in Bradford, West Yorkshire, and is part of the Exceed Academies Trust.

The Academy specialises in supporting pupils who have found it difficult to integrate in mainstream settings, and staff are highly qualified and experienced in supporting SEND and social, emotional, mental health and behavioural needs.

After reaching out to Park Aspire to discuss the differences between licence-free and licenced radios, the challenge was finding them licenced radios that were budget-friendly but still delivered the right results when it came to communication coverage.

THE SOLUTION

We installed Eemits ultra-smart digital two-way radio solution - TRBOCALL – a modular platform comprising the following:

H ARDWARE

Park Aspire Academy chose 34:

Hytera BP515 radio devices

The Benefits:

Park Aspire Academy chose the Hytera BP515 device for use across their school.

The Hytera BP515 was the ideal solution for the school as it's a compact licenced radio that is easy to use and carry, and it has eight times the power output of a licence-free model.

This means coverage is easier to come by in built-up areas.

Part of Hytera's BP series of radios, the BP515 is an affordable digital device that has high-performance integrated voice and data capabilities.

And with the Academy looking for licenced radios that could be utilised effectively without breaking the budget, the BP515 was the perfect choice.

Using a licenced radio is a big deal for any school as it means you won't experience any outside interference like you can with licence-free radios.

And with so many young people on site, it was important that the school had safe, secure, and discreet conversations at all times.

The BP515 comes equipped with clear and loud audio, expanded coverage, and high-energy battery performance.

THE RESULTS

Park Aspire Academy now has radios in place that gives them the right coverage, high-performance battery capabilities, all without becoming an unaffordable long-term investment.

And by using licenced radio devices, they are reducing the risk of unnecessary safeguarding issues that can be caused by using the wrong type of communication device.

Eemits innovative modular platform TRBOCALL - a unique combination of hardware, bespoke software applications and digital features - together create an ultra-smart two-way radio system. Combined with unrivalled wide area network coverage, our customers have the flexibility to build their own system with all, or a combination of infrastructure, hardware, software service wrap, features and accessories that suite their individual business needs.
